Did you know??

- 1 in 5 of the population get flu most years, and this includes healthy people
- Flu is one of the top 3 causes of sickness absence
- In 2016 an average of 4.3 days were lost due to sickness overall, at an average cost of £108 per day
- Flu is highly contagious, spreads rapidly and anyone can catch it

The single most effective way to prevent flu spreading is to have the flu vaccination each year.

Not only does this reduce the risk of sickness and absence, but it also shows your staff that you are supporting them to remain healthy throughout the winter. As your local Community Pharmacy we are committed to helping improve the health and wellbeing of our local community and would like to offer you our flu vaccination service.

- Your Staff can attend the pharmacy at a time to suit
- Vouchers are a great option for field based staff or those working varied hours
